ATLAS
-STUDENT SUCCESS INTELLIGENCE PLATFORM

CUSTOMER SEGMENTS

- **Government buyers**: State Higher Education Departments, relevant education agencies and government-supported digital education initiatives
- **Institutional customer**s: Government and private colleges, universities and multi-campus institutions.
- **End users**: College administrators, faculty, mentors, placement officers and academic advisors
- **.Beneficiaries:** Students needing academic guidance, attendance support and placement preparation
- **Market entry**: Begin with 1–2 pilot colleges and expand through validated institutional partnerships..

VALUE PROPOSITIONS

- **Early risk identification**: Uses analytics and ML to flag students who may need additional support.
- **Explainable AI:** Shows the factors contributing to risk indicators and predicted outcomes.
- **Actionable interventions:** Helps faculty assign, track and review student-support activities.
- **Institutional decision intelligenc**e: Provides dashboards, cohort comparisons and actionable reports.
- **Scalable and responsible:** Designed for integration with campus systems, with privacy controls and human-reviewed decisions.

CHANNELS

- Direct outreach to colleges and university administrators.
- Pilot demonstrations and proof-of-concept deployments.
- Government innovation programs and eligible procurement opportunities.
- Partnerships with ERP, LMS and system integration providers.
- Project website, online demonstrations and professional networks.
- Pilot case studies, institutional presentations and education conferences.

CUSTOMER RELATIONSHIPS

- Dedicated institutional onboarding and implementation support.
- Faculty and administrator training.
- Technical support and documented self-service guidance.
- Regular stakeholder meetings and performance reviews.
- User feedback collection and continuous platform improvement.
- Recurring institutional subscriptions with support and maintenance options.

REVENUE STREAMS

- Annual or multi-year institutional software licences.
- Tiered subscriptions based on student population, campuses and features.
- Initial implementation, data integration and customization fees.
- Training and capacity-building services.
- Annual maintenance and technical support contracts.
- Premium analytics, advanced reporting and enterprise integrations.

KEY RESOURCES

- **Technology:** React frontend, Python/FastAPI backend, databases and analytics infrastructure.
- **AI/ML**: Predictive models, data-processing pipelines and AI-assisted explanations.
- **Human resources**: Software developers, ML engineers, data analysts and education-domain advisors.
- **Digital assets**: Source code, APIs, dashboards, documentation and deployment infrastructure.
- **Institutional resources:** Authorized datasets, pilot partnerships and user feedback.
- **Financial resources**: Development funding, cloud budget, working capital and ongoing R&D investment.

KEY ACTIVITIES

- Develop and continuously improve the ATLAS web platform.
- Integrate and validate academic, attendance and placement data.
- Build, test and evaluate ML-based risk and performance models.
- Generate explainable insights and intervention recommendations.
- Maintain data security, privacy, access controls and audit logs.
- Deploy pilots, train users, monitor performance and measure outcomes.

KEY PARTNERSHIPS

- State Higher Education Departments and participating colleges.
- Universities, faculty mentors and placement departments.
- Campus ERP, SIS and LMS integration providers.
- Cloud hosting and cybersecurity service providers.
- AI/ML infrastructure and API providers.
- Education-technology incubators, training organizations and research institutions.
- Government innovation and public-private partnership programs, where eligible.

COST STRUCTURE

- Software development, testing and maintenance.
- Cloud hosting, storage, backups and database costs.
- AI API usage and ML model development and evaluation.
- Institutional data integration and migration.
- Security, privacy, compliance and independent assessments.
- User training, onboarding and customer support.
- Pilot execution, business development and administrative expenses.
